Postdoctoral Research Positions in Condensed Matter Theory at TUM

The quantum Condensed Matter Theory groups, lead by Professors Michael Knap, Frank Pollmann, and Wilhelm Zwerger expect to appoint one or more postdoctoral fellows in **Fall 2018**. We are looking for candidates who are interested in **quantum condensed matter theory** including: ultracold atomic gases, strongly correlated electrons, disordered many-body systems, nonequilibrium quantum dynamics, and topological phases of matter.

For inquiries, please send your curriculum vitae and a brief research statement. Candidates should also arrange for letters of recommendation to be submitted from two scientists familiar with their work. Candidates may also wish to include selected preprints or reprints of articles they have written.

Applications and supporting material should be sent to cmt@ph.tum.de by

December 17, 2017

however, later applications may also be considered. Successful candidates will be strongly encouraged to join ongoing international collaborations with leading experimental and theoretical researchers.

Further information can be found at <http://www.cmt.ph.tum.de> .

The postdoctoral fellowship from the Condensed Matter Theory groups at TUM is planned to be offered every Fall.
